Tila Curriculum Blueprint

A redesigned adult-beginner pathway from zero Arabic reading to Surah Al-Fatiha, then onward to independent Quran reading.

Purpose

Turn Tila into a real Quran-reading acquisition system for adult reverts: early decoding, early connected-script exposure, honest retention checks, a clear Al-Fatiha milestone, and a post-Fatiha runway that ends in independent mushaf reading.

Document type	Curriculum strategy and lesson-map brief
Audience	Founder, content designer, curriculum writer, and product builder
Design stance	Mobile-first, adult-first, transfer-first, low-theory, high-retention

Executive summary

The current Tila repo has real product infrastructure - offline-first architecture, spaced review, mastery tracking, and a connected-reading generator - but the visible lesson map is still shaped like a recognition-first alphabet course. This redesigned curriculum reverses that logic: it teaches decoding almost immediately, introduces connected forms early, builds only the letters and rules required to reach Al-Fatiha first, and then completes the reading system after that first real Quran win.

Repo-grounded snapshot of the current product

Observed in repo	Why it matters
App is described as a mobile app for learning Arabic (Quranic reading), built offline-first with Expo Router, hooks, an engine layer, and SQLite.	The product is already set up to support a serious learning loop; the main weakness is curriculum sequencing, not just app plumbing.
The lesson file begins with Phase 1 recognition lessons like 'Meet Alif' and the published path runs through a Phase 4 'Connected Forms Mastery' endpoint.	The current learning path still behaves more like a symbol-recognition curriculum than a reading-acquisition curriculum.
The review generator already supports weighted micro-review for weaker due entities.	Short adaptive review bursts are already compatible with a stronger retention model.
The mastery layer already tracks letters, combos, visual/sound/contrast skills, and confusion keys.	The repo can support finer-grained reading progression than the current content is demanding.
A connected-reading generator already exists in the engine.	The engine is ahead of the curriculum; that gap should be closed.

Design principles for the new curriculum

Teach reading, not inventory. A learner should decode tiny Arabic chunks in lesson 2, not after dozens of recognition drills.

Introduce connected script early. Arabic is connected writing. Treating connected forms as a late special phase trains the wrong visual system first.

Delay nonessential coverage. The learner does not need the entire alphabet before reaching a meaningful Quran-reading win.

Use audio constantly, but not as a crutch. Audio should reinforce print-to-sound mapping and self-correction, not replace decoding.

Keep theory off the main path. Adult reverts need a clear path to reading; deep phonetics and grammar belong in optional layers.

Gate progress with retained performance. Unlocks should depend on decoding and retention, not on superficial lesson completion.

Exercise library used across the curriculum

Type	Purpose	Best stage	Bad use to avoid
Tap	Fast visual recognition of a letter or form.	Earliest lessons, then quick warm-ups.	Using it as the main proof that the learner can read.
Hear	Audio-to-script or script-to-audio matching.	All stages.	Letting the learner follow audio without looking carefully at print.
Choose	Tight discrimination between confusable items.	Any time confusion pairs appear.	Easy distractors that make guessing look like learning.
Build	Tap-to-assemble letters, marks, or chunks.	As soon as the learner knows a few symbols.	Building from transliteration instead of Arabic.
Read	Decode a chunk, word, phrase, line, or verse.	Core of the whole product.	Saving this for late in the course.
Fix	Correct the wrong mark, wrong letter, or wrong pattern.	After a concept is partly learned.	Using vague prompts with no focused target.
Check	Formal checkpoint with reduced scaffolding.	End of blocks only.	Recycling familiar prompts so the learner can pass by memory.

Curriculum map at a glance

Phase	Lessons	Phase title	Primary outcome	Question mix
1	1-8	First Real Decoding Wins	Get the learner from 'Arabic scares me' to 'I can sound out tiny Arabic chunks.'	Tap, Hear, Choose, Build, Read
2	9-18	Three Short Vowels and Early Connected Forms	Build secure short-vowel reading and introduce connected script before bad isolated-form habits set in.	Hear, Choose, Build, Read, Fix
3	19-28	Core Word Reading and Joining Logic	Turn short chunk reading into short word reading while making joining behavior feel normal.	Choose, Build, Read, Fix
4	29-38	Long Vowels, Diphthongs, and Heavy Letters	Teach the vowel behavior and core consonants needed for Al-Fatiha without teaching the whole alphabet first.	Hear, Choose, Build, Read, Fix
5	39-48	Quran-Script Bridge	Bridge from simplified connected Arabic to the orthographic realities of Quran text.	Hear, Choose, Build, Read, Fix
6	49-62	Surah Al-Fatiha Transfer	Take the learner from chunk-level decoding to a full, unsupported reading of Surah Al-Fatiha.	Hear, Build, Read, Fix, Check
7	63-74	Post-Fatiha: Alphabet Completion and High-Frequency Gaps	Complete the remaining high-frequency letters and small orthographic patterns that were intentionally delayed before Al-Fatiha.	Tap, Hear, Choose, Build, Read, Fix
8	75-86	Post-Fatiha: Essential Quran Orthography and Pausing	Teach the minimum extra orthography and stopping behavior needed for broader Quran reading.	Hear, Choose, Build, Read, Fix
9	87-96	Post-Fatiha: Juz Amma Transfer I (Very Short Surahs)	Turn a single-surah win into repeated success on short, unfamiliar surahs.	Hear, Build, Read, Fix, Check
10	97-108	Post-Fatiha: Juz Amma Transfer II (Medium Short Surahs)	Extend transfer into longer short surahs and reduce support further.	Hear, Build, Read, Fix, Check
11	109-120	Post-Fatiha: Mushaf Line Fluency and Unseen Reading	Teach the mechanics of sustained mushaf reading: line tracking, pause control, and self-correction.	Read, Hear, Fix, Check

12	121-132	Post-Fatiha: Expansion to Whole-Quran Independence	Turn short-surah competence into a repeatable system for continuing through the Quran independently.	Read, Hear, Fix, Check

Promotion rules and review cadence

- Standard lesson length: 4-6 minutes, usually 10 scored items.
- Standard pass threshold: 85%; the last 2 decoding items must be correct.
- Checkpoint threshold: 90% overall and at least 80% on reading/decode items specifically.
- Reviews: end-of-lesson micro review, then next day, 3 days, 7 days, 14 days, and 30 days.
- No major block unlock if the review queue shows obvious weakness on the exact skills the next block depends on.

Phase 1: First Real Decoding Wins

Goal	Get the learner from 'Arabic scares me' to 'I can sound out tiny Arabic chunks.'
Why this is better than the current sequence	The live repo starts with a long isolated-letter recognition runway. This phase forces genuine reading from lesson 2 instead of treating symbol familiarity as progress.

Lesson map (Lessons 1-8)

#	Lesson title	What the lesson teaches / proves	Primary question types
1	**Arabic Starts Here**	Orient to right-to-left reading, shape change in words, and the idea that a letter plus a mark makes a sound.	Tap, Hear
2	**Meet Alif + Ba with Fatha**	Learn ا and ب with fatḥa and read the first real syllable: بَ.	Tap, Hear, Choose, Read
3	**Meet Meem**	Add م and read مَ / بَ without guessing.	Tap, Hear, Choose, Build, Read
4	**Meet Laam**	Add ل and expand the first readable set of symbols.	Tap, Hear, Choose, Build, Read
5	**First Decoding Sprint**	No new symbols; decode short CV chunks using the known letters only.	Hear, Choose, Build, Read, Fix
6	**Meet Noon**	Add ن and push the learner to hold a 5-letter working set.	Tap, Hear, Choose, Build, Read
7	**Checkpoint 1: Tiny Chunks**	Confirm the learner can decode short unseen items, not merely tap familiar letters.	Check
8	**Kasra Arrives**	Add kasra to known letters and distinguish ba/bi, ma/mi, la/li, na/ni.	Hear, Choose, Build, Read, Fix

What the learner should be able to do at the end of this phase

Decode tiny Arabic syllables with a small letter set and one short vowel system beginning to form.

Phase 2: Three Short Vowels and Early Connected Forms

Goal	Build secure short-vowel reading and introduce connected script before bad isolated-form habits set in.
Why this is better than the current sequence	In the current lesson map, harakat and connected forms arrive much later. This phase moves both forward so the learner's practice already resembles real Quran reading.

Lesson map (Lessons 9-18)

#	Lesson title	What the lesson teaches / proves	Primary question types
9	**Damma Arrives**	Add damma on known letters and complete the a/i/u short-vowel set.	Hear, Choose, Build, Read, Fix
10	**Short-Vowel Contrast Drill**	Drill fatḥa vs kasra vs damma until the learner stops guessing by shape alone.	Hear, Choose, Read, Fix
11	**Meet Yaa**	Teach ي as a consonant first, without introducing long ee yet.	Tap, Hear, Choose, Build, Read
12	**Meet Haa (ه)**	Add ه and broaden simple decoding capacity.	Tap, Hear, Choose, Build, Read
13	**Known Letters in Connected Form**	Show the already-known letters joined in real connected strings.	Tap, Choose, Build, Read
14	**Alif Breaks the Chain**	Teach non-connecting behavior through reading, not typography trivia.	Tap, Choose, Build, Read, Fix
15	**Meet Seen**	Add س and increase useful readable combinations quickly.	Tap, Hear, Choose, Build, Read
16	**Meet Daal**	Add د and teach another chain-breaker in context.	Tap, Hear, Choose, Build, Read, Fix
17	**Sukun Arrives**	Introduce consonant stopping so the learner can read more Quran-like chunks.	Hear, Choose, Build, Read, Fix
18	**Checkpoint 2: Early Connected Reading**	Assess connected chunks with short vowels and early sukun.	Check

What the learner should be able to do at the end of this phase

Handle all three short vowels, basic sukun, and early connected strings without freezing.

Phase 3: Core Word Reading and Joining Logic

Goal	Turn short chunk reading into short word reading while making joining behavior feel normal.
Why this is better than the current sequence	The current curriculum treats joining as a late phase. This phase treats joining and decoding as one task, which is closer to how mushaf reading actually works.

Lesson map (Lessons 19-28)

#	Lesson title	What the lesson teaches / proves	Primary question types
19	**Read BISM-Style Chunks**	Practice the first small clusters that feel like real Quran words.	Hear, Build, Read, Fix
20	**Meet Raa**	Add ر and teach a high-frequency non-connector used all over Quranic text.	Tap, Hear, Choose, Build, Read
21	**Meet Kaaf**	Add ك and continue short connected-word building.	Tap, Hear, Choose, Build, Read
22	**Meet Taa (ت)**	Add ت as the first serious dot-family expansion after the learner can already read.	Tap, Hear, Choose, Build, Read
23	**Meet Ayn (ع)**	Introduce ع as a reading target without overloading the learner with articulation theory.	Tap, Hear, Choose, Build, Read
24	**Breakers Review**	Reinforce alif, daal, and raa as chain-breakers inside real strings.	Choose, Build, Read, Fix
25	**Meet Haa (ح)**	Add ح and prepare for Quran words that use the ح/ه distinction.	Tap, Hear, Choose, Build, Read
26	**Build Short Connected Words**	Assemble and decode 2-3 letter connected items using only known content.	Build, Read, Fix
27	**First Unseen Mini-Words**	Force real transfer with unfamiliar but decodable items.	Hear, Read, Fix
28	**Checkpoint 3: Short Word Reading**	Assess whether the learner can read short connected words independently.	Check

What the learner should be able to do at the end of this phase

Read short connected words and survive chain-breaker behavior in context.

Phase 4: Long Vowels, Diphthongs, and Heavy Letters

Goal	Teach the vowel behavior and core consonants needed for Al-Fatiha without teaching the whole alphabet first.
Why this is better than the current sequence	Instead of marching through the full alphabet in isolation, this phase teaches only what is needed for real Quran transfer and folds it into reading immediately.

Lesson map (Lessons 29-38)

#	Lesson title	What the lesson teaches / proves	Primary question types
29	**Long A (aa)**	Teach fatḥa + alif as a long vowel and contrast it with the short a sound.	Hear, Choose, Build, Read, Fix
30	**Long E (ee)**	Teach kasra + yaa as long ee using already-known symbols.	Hear, Choose, Build, Read, Fix
31	**Meet Waw + Long Ooo**	Teach و both as a consonant and as the carrier of long ū.	Tap, Hear, Choose, Build, Read
32	**Waw: Consonant or Long Vowel?**	Train the learner to read the function of و from context.	Hear, Choose, Read, Fix
33	**Yaa: Consonant or Long Vowel?**	Train the learner to separate consonant y from long ī.	Hear, Choose, Read, Fix
34	**Diphthongs ay / aw**	Teach the patterns needed for words like غَيْرِ and يَوْمِ.	Hear, Choose, Build, Read, Fix
35	**Meet Qaaf**	Add ق for later high-frequency Quran words.	Tap, Hear, Choose, Build, Read
36	**Meet Saad**	Add ص and normalize emphatic letters through reading rather than lecture.	Tap, Hear, Choose, Build, Read
37	**Meet Daad**	Add ض and prepare directly for الضَّالِّينَ.	Tap, Hear, Choose, Build, Read
38	**Checkpoint 4: Long Vowels and Heavy Letters**	Confirm that short/long contrast and the new letters survive transfer.	Check

What the learner should be able to do at the end of this phase

Distinguish short vs long vowels and handle the heavy letters required for Al-Fatiha.

Phase 5: Quran-Script Bridge

Goal	Bridge from simplified connected Arabic to the orthographic realities of Quran text.
Why this is better than the current sequence	Most beginner products fail at the mushaf bridge. This phase handles shaddah, hamza, dagger alif, and definite article behavior before Surah transfer, instead of ambushing the learner with them later.

Lesson map (Lessons 39-48)

#	Lesson title	What the lesson teaches / proves	Primary question types
39	**Meet Ghayn**	Add غ in a controlled way before it appears in real Quran words.	Tap, Hear, Choose, Build, Read
40	**Meet Dhaal**	Add ذ for الَّذِينَ and related patterns.	Tap, Hear, Choose, Build, Read
41	**Alif-Laam in Quran Words**	Teach the ال opening pattern as reading behavior, not grammar theory.	Hear, Choose, Build, Read, Fix
42	**Sun-Letter Pattern for Needed Letters**	Teach assimilation only for the letters the learner will immediately meet in Al-Fatiha.	Hear, Choose, Read, Fix
43	**Shaddah**	Teach doubled consonants for اللَّهِ, الرَّحْمٰنِ, and الضَّالِّينَ.	Hear, Choose, Build, Read, Fix
44	**Hamza and Starter Alif**	Teach enough hamza/alif behavior to survive إِيَّاكَ, أَنْعَمْتَ, and اهْدِنَا.	Tap, Hear, Choose, Read
45	**Dagger Alif and Small Quran Marks**	Teach the few Quran-only marks the learner must recognize before Surah reading.	Tap, Choose, Read, Fix
46	**Allah Word Form**	Normalize اللَّهِ as a special high-frequency Quran word.	Hear, Build, Read, Fix
47	**Mixed Quran-Script Decoding**	Use short, real Quran-style chunks with the new orthographic features.	Hear, Build, Read, Fix
48	**Checkpoint 5: Quran-Script Readiness**	Do not unlock Surah transfer until the learner can handle Quran-script basics.	Check

What the learner should be able to do at the end of this phase

Decode the Quran-specific forms that make a mushaf feel different from simplified Arabic text.

Phase 6: Surah Al-Fatiha Transfer

Goal	Take the learner from chunk-level decoding to a full, unsupported reading of Surah Al-Fatiha.
Why this is better than the current sequence	The current curriculum ends at connected-form mastery. This phase delivers the actual product promise: reading real Quran, not just recognizing Arabic pieces.

Lesson map (Lessons 49-62)

#	Lesson title	What the lesson teaches / proves	Primary question types
49	بِسْمِ	Read the opening chunk cleanly and without transliteration support.	Hear, Build, Read, Fix
50	اللَّهِ	Read the Allah form in context.	Hear, Build, Read, Fix
51	بِسْمِ اللَّهِ	Assemble and read the first phrase as a whole.	Hear, Build, Read, Fix
52	الرَّحْمٰنِ / الرَّحِيمِ	Read the pair that introduces shaddah, dagger alif, and long vowels together.	Hear, Choose, Build, Read, Fix
53	الْحَمْدُ / لِلَّهِ / رَبِّ	Read the opening chunks of ayah 2 with confidence.	Hear, Build, Read, Fix
54	الْعَالَمِينَ	Handle a longer chunk with long vowels and connected script.	Hear, Build, Read, Fix
55	مَالِكِ / يَوْمِ / الدِّينِ	Combine long vowels, diphthongs, and shaddah in real ayah material.	Hear, Choose, Build, Read, Fix
56	إِيَّاكَ / نَعْبُدُ	Read a phrase with hamza, shaddah, and sukun in context.	Hear, Build, Read, Fix
57	وَإِيَّاكَ / نَسْتَعِينُ	Extend phrase reading with longer connected material.	Hear, Build, Read, Fix
58	اهْدِنَا / الصِّرَاطَ / الْمُسْتَقِيمَ	Read a full phrase containing several Quran-script features at once.	Hear, Choose, Build, Read, Fix
59	صِرَاطَ / الَّذِينَ / أَنْعَمْتَ / عَلَيْهِمْ	Read a larger chain of chunks with minimal support.	Hear, Build, Read, Fix
60	غَيْرِ / الْمَغْضُوبِ / عَلَيْهِمْ / وَلَا / الضَّالِّينَ	Finish the final complex segment of the surah.	Hear, Choose, Build, Read, Fix
61	**Full Al-Fatiha Guided Read**	Read the full surah with light scaffolding, replayable audio, and tracking help.	Hear, Read
62	**Full Al-Fatiha Unsupported**	Pass the course milestone only after an unsupported chunk-by-chunk reading of the full surah.	Check

What the learner should be able to do at the end of this phase

Read Surah Al-Fatiha from Quran script chunk by chunk without transliteration support; still slowly, but independently and honestly.

Phase 7: Post-Fatiha: Alphabet Completion and High-Frequency Gaps

Goal	Complete the remaining high-frequency letters and small orthographic patterns that were intentionally delayed before Al-Fatiha.
Why this is better than the current sequence	The current sequence tries to complete the entire alphabet before reading. This phase completes the inventory after a real win, so the learner is adding missing pieces onto an existing reading system instead of waiting forever for permission to read.

Lesson map (Lessons 63-74)

#	Lesson title	What the lesson teaches / proves	Primary question types
63	**Meet Fa**	Add ف and attach it immediately to real Quran words.	Tap, Hear, Choose, Build, Read
64	**Meet Tha**	Add ث only after the learner already has a working decoding routine.	Tap, Hear, Choose, Build, Read
65	**Ba-Ta-Tha Stress Test**	Drill the dot family in connected words, not isolated flashcards.	Hear, Choose, Read, Fix
66	**Meet Jeem**	Add ج in context.	Tap, Hear, Choose, Build, Read
67	**Meet Khaa**	Add خ and contrast it against ج/ه/ح.	Tap, Hear, Choose, Build, Read
68	**Jeem-Haa-Khaa Family in Quran Words**	Run a controlled family review inside real words.	Hear, Choose, Read, Fix
69	**Meet Zay**	Add ز in connected reading.	Tap, Hear, Choose, Build, Read
70	**Meet Sheen**	Add ش and contrast it against س.	Tap, Hear, Choose, Build, Read
71	**Seen-Sheen and Raa-Zay Review**	Clean up two common visual contrast pairs.	Hear, Choose, Read, Fix
72	**Meet Taa (ط)**	Add the emphatic ط through reading, not phonetics lecture.	Tap, Hear, Choose, Build, Read
73	**Meet Dhaa (ظ)**	Add ظ and contrast it against ذ and ض in controlled items.	Tap, Hear, Choose, Build, Read
74	**Checkpoint 7: Alphabet Completion**	Confirm the learner can read with the full core alphabet, not just recognize it.	Check

What the learner should be able to do at the end of this phase

Read with the full core alphabet and stop treating missing letters as hidden landmines.

Phase 8: Post-Fatiha: Essential Quran Orthography and Pausing

Goal	Teach the minimum extra orthography and stopping behavior needed for broader Quran reading.
Why this is better than the current sequence	Instead of burying the learner in tajweed theory, this phase teaches only the orthographic behaviors that materially affect independent reading.

Lesson map (Lessons 75-86)

#	Lesson title	What the lesson teaches / proves	Primary question types
75	**Taa Marbuta**	Teach ة in pause and continuation with practical reading examples.	Tap, Hear, Choose, Read
76	**Alif Maqsura**	Teach ى as a reading target in common Quran words.	Tap, Hear, Choose, Read
77	**Tanween: an / in / un**	Introduce nunation as a reading pattern, not grammar class.	Hear, Choose, Build, Read, Fix
78	**Tanween + Pause Behavior**	Teach what changes when the reader stops on a word.	Hear, Choose, Read, Fix
79	**Hamzat al-Wasl Basics**	Teach entry alif behavior at the start of words.	Hear, Choose, Read, Fix
80	**Definite Article Review**	Expand sun- and moon-letter reading beyond the Al-Fatiha subset.	Hear, Choose, Read, Fix
81	**Long-Vowel Confidence in Quran Words**	Stabilize madd letters in running Quranic text.	Hear, Choose, Build, Read
82	**Madd Letters in Real Quran Words**	Read words where long-vowel behavior can no longer be guessed.	Hear, Choose, Read, Fix
83	**Shaddah Under Speed**	Keep doubled consonants accurate when the learner reads longer lines.	Hear, Choose, Read, Fix
84	**Sukun Clusters and Restarting**	Train stop-start accuracy and cluster decoding.	Hear, Choose, Build, Read, Fix
85	**Waqf Marks Essentials**	Teach a very small set of pause symbols needed for independent reading.	Tap, Choose, Read
86	**Checkpoint 8: Orthography and Pausing**	Do not broaden the reading path until the learner can survive real Quran notation.	Check

What the learner should be able to do at the end of this phase

Handle pausing, tanween, and key orthographic features that appear beyond Al-Fatiha.

Phase 9: Post-Fatiha: Juz Amma Transfer I (Very Short Surahs)

Goal	Turn a single-surah win into repeated success on short, unfamiliar surahs.
Why this is better than the current sequence	This phase prevents the learner from mistaking memorized Al-Fatiha familiarity for broad reading competence by forcing transfer to new surahs quickly.

Lesson map (Lessons 87-96)

#	Lesson title	What the lesson teaches / proves	Primary question types
87	**Surah Al-Ikhlas Part 1**	Read the first half of Al-Ikhlas without transliteration.	Hear, Build, Read, Fix
88	**Surah Al-Ikhlas Part 2**	Read the second half and connect the surah as a whole.	Hear, Build, Read, Fix
89	**Surah Al-Ikhlas Full Read**	Read the full surah with minimal support.	Hear, Read, Check
90	**Surah Al-Kawthar**	Apply the reading system to a short surah with different patterns.	Hear, Build, Read, Fix
91	**Surah Al-Asr**	Transfer to a short surah with a distinct rhythm and vocabulary set.	Hear, Build, Read, Fix
92	**Surah Al-Fil**	Handle a slightly longer short surah using known patterns.	Hear, Build, Read, Fix
93	**Surah Quraysh**	Continue transfer into a companion short surah with new word shapes.	Hear, Build, Read, Fix
94	**Short-Surah Contrast Review**	Mix words and chunks from the first post-Fatiha surahs.	Hear, Choose, Read, Fix
95	**Unseen Words from Taught Surahs**	Assess whether the learner can decode beyond memorized verse order.	Hear, Read, Fix
96	**Checkpoint 9: Juz Amma Transfer I**	Confirm that short-surah reading is now real and repeatable.	Check

What the learner should be able to do at the end of this phase

Transfer the reading system to new very short surahs rather than one memorized milestone.

Phase 10: Post-Fatiha: Juz Amma Transfer II (Medium Short Surahs)

Goal	Extend transfer into longer short surahs and reduce support further.
Why this is better than the current sequence	This phase pushes the learner past the very shortest surahs so the product begins to feel like a real Quran-reading system instead of a set of isolated wins.

Lesson map (Lessons 97-108)

#	Lesson title	What the lesson teaches / proves	Primary question types
97	**Surah Al-Ma'un Part 1**	Start handling longer verse chains with familiar support.	Hear, Build, Read, Fix
98	**Surah Al-Ma'un Part 2**	Finish the surah and reinforce continuity over multiple ayat.	Hear, Build, Read, Fix
99	**Surah Al-Kafirun Part 1**	Begin a longer repeated-pattern surah.	Hear, Build, Read, Fix
100	**Surah Al-Kafirun Part 2**	Complete the surah with less scaffolding.	Hear, Build, Read, Fix
101	**Surah An-Nasr**	Read a short but denser surah with firmer independence.	Hear, Build, Read, Fix
102	**Surah Al-Lahab Part 1**	Read the opening half of a surah with more unfamiliar word shapes.	Hear, Build, Read, Fix
103	**Surah Al-Lahab Part 2**	Complete the surah and sustain connected reading.	Hear, Build, Read, Fix
104	**Surah Al-Falaq**	Transfer to a very common memorized surah without leaning on memorization.	Hear, Build, Read, Fix
105	**Surah An-Nas**	Repeat the test on another high-memorization surah while verifying real decoding.	Hear, Build, Read, Fix
106	**Medium-Short Surah Fluency Mix**	Use mixed ayah chunks from the taught surahs to strengthen pace and accuracy.	Hear, Read, Fix
107	**Unseen Transfer within Juz Amma**	Read unfamiliar ayah fragments built from already-taught patterns.	Hear, Read, Fix
108	**Checkpoint 10: Juz Amma Transfer II**	Confirm medium-short surahs are readable without the app holding the learner's hand.	Check

What the learner should be able to do at the end of this phase

Read a growing set of medium-short surahs with less support and stronger pace control.

Phase 11: Post-Fatiha: Mushaf Line Fluency and Unseen Reading

Goal	Teach the mechanics of sustained mushaf reading: line tracking, pause control, and self-correction.
Why this is better than the current sequence	Most beginner apps never teach the act of reading across real lines of Quran text. This phase makes that skill explicit so the learner can leave the app and still function.

Lesson map (Lessons 109-120)

#	Lesson title	What the lesson teaches / proves	Primary question types
109	**Line Tracking and Phrase Chunking**	Learn how to move the eyes across a mushaf line without losing place.	Read, Hear
110	**Reading Across Line Breaks**	Continue meaningfully when a phrase spans lines.	Read, Hear, Fix
111	**Pause, Breathe, Resume**	Build controlled stop-start behavior during longer reads.	Hear, Read, Fix
112	**Common Error Families in Connected Script**	Target the mistakes adult beginners actually make in flowing text.	Hear, Choose, Read, Fix
113	**Long-Word Breakdown Strategies**	Teach how to decompose intimidating long words into readable parts.	Read, Fix
114	**Similar-Word Discrimination**	Train the learner not to auto-complete familiar-looking words incorrectly.	Hear, Choose, Read, Fix
115	**Guided Mushaf Page Snippets**	Read short snippets presented in mushaf-like layout.	Read, Hear, Fix
116	**Unfamiliar Ayah Fragments**	Handle fragments the learner is unlikely to have memorized.	Read, Fix
117	**Audio Shadowing for Pacing**	Use recitation as pacing support rather than as a crutch.	Hear, Read
118	**Read-Then-Hear Correction**	Read first, then compare against audio to develop self-audit.	Read, Hear, Fix
119	**Timed Accurate Reading**	Introduce light time pressure without letting accuracy collapse.	Read, Check
120	**Checkpoint 11: Fluency Foundations**	Confirm that the learner can sustain accurate reading beyond one line.	Check

What the learner should be able to do at the end of this phase

Track lines, recover after pauses, and self-correct while reading unfamiliar snippets.

Phase 12: Post-Fatiha: Expansion to Whole-Quran Independence

Goal	Turn short-surah competence into a repeatable system for continuing through the Quran independently.
Why this is better than the current sequence	This phase answers the real question after Al-Fatiha: not 'can the learner finish a course?' but 'can the learner keep reading the Quran properly after the app stops guiding every step?'

Lesson map (Lessons 121-132)

#	Lesson title	What the lesson teaches / proves	Primary question types
121	**High-Frequency Quran Word Bank I**	Internalize a set of recurring words that accelerate broader Quran reading.	Tap, Hear, Read
122	**High-Frequency Quran Word Bank II**	Extend the recurring-word bank while keeping decoding primary.	Tap, Hear, Read
123	**Pattern Recognition Without Grammar Overload**	Notice recurring word patterns without turning the course into an Arabic grammar class.	Read, Fix
124	**Pronouns and Connectors in Running Text**	Reduce hesitation on tiny words that appear everywhere in Quran.	Read, Fix
125	**Common Openings and Recurring Phrases**	Use repeated Quranic formulae to build reading economy, not memorization dependence.	Read, Hear
126	**Read Longer Ayah Sets**	Sustain accurate reading over multi-ayah stretches.	Read, Hear, Fix
127	**Handle Unfamiliar Letters Under Fatigue**	Stabilize performance when the learner is tired or the text gets visually dense.	Read, Fix
128	**Mastery Rescue Review**	Use the app's spaced-review engine to rescue weak letters, patterns, and confusion pairs.	Hear, Choose, Read, Fix
129	**Independent Surah Selection**	Let the learner choose a new short surah and work through it with guided prompts.	Read, Hear, Fix
130	**Guided Session: New Surah, No Memorization**	Read a new surah the learner is unlikely to know by memory.	Read, Fix, Check
131	**Unsupported Unseen Reading Assessment**	Perform an unseen reading task that looks and feels like real use outside the app.	Check
132	**Graduation + 90-Day Quran Plan**	Exit with a practical next-step plan for continuing through the Quran independently.	Read, Check

What the learner should be able to do at the end of this phase

Use a repeatable method for choosing, decoding, and continuing through new Quran material independently.

How the post-Fatiha path turns into proper Quran reading

1. Al-Fatiha is not the finish line. It is the first proof point. A learner who can read only Al-Fatiha may still be leaning on familiarity. The post-Fatiha phases deliberately force transfer to new surahs, new line layouts, and unfamiliar ayah fragments.

2. Alphabet completion comes after the first real win. This is intentional. Before Al-Fatiha the course teaches only the letters and behaviors needed for the promise. After that, it fills the remaining gaps without making the learner wait months for meaning.

3. Orthography and pausing are taught as reading behaviors. The learner gets just enough tanween, hamzat al-wasl, taa marbuta, alif maqsura, and waqf-mark knowledge to continue reading Quran correctly enough to function independently.

4. Juz Amma becomes a transfer ladder, not a memorization trap. The app should keep mixing familiar surahs with unseen fragments so the learner cannot confuse memorized recitation with actual decoding skill.

5. Mushaf fluency is a skill in its own right. Line tracking, restart control, self-correction, and the ability to break long words into readable parts must be taught explicitly. Most apps skip this and then wonder why users collapse outside the lesson UI.

6. Proper reading still does not mean full tajweed mastery. This plan gets the learner to accurate, independent reading with basic pausing and common Quran-script handling. Advanced tajweed should exist as a parallel or later layer, not as a blocker to learning to read.

What this changes relative to the current curriculum

Current repo logic	Proposed curriculum logic
Recognition first, reading later.	Reading starts in lesson 2 and remains the center of gravity.
Connected forms treated as a late phase.	Connected forms appear as soon as the learner has a small usable set.
Full alphabet momentum before the first Quran win.	Only the necessary inventory is taught before Al-Fatiha; the rest comes after the first meaningful milestone.
Possible false progress through symbol familiarity.	Progress is gated by decoding and retention, especially at checkpoints.
Engine capabilities exceed the visible curriculum.	The curriculum is rebuilt to exploit the repo's existing review, mastery, and connected-reading infrastructure.

Implementation note for Tila

You do not need to rebuild the app from scratch to use this plan. The existing engine already points in the right direction: micro-review exists, mastery already models letters and combos, and a connected-reading generator exists. The heavy lift is curriculum authoring, better sequencing, tighter checkpoints, and expanding the post-Fatiha content map until the app teaches transfer instead of just completion.

Final verdict

Tila can absolutely become a serious Quran-reading product for adult reverts, but only if it stops acting like a prettier alphabet course. This blueprint gives it a real acquisition path: from zero, to first decoding, to Al-Fatiha, to post-Fatiha transfer, to independent Quran reading that still works when the app is no longer holding the learner’s hand.
